Calflex

1985 Calflex was founded in 1985 producing tapware items, such as accessories and hoses. A few years later, the company's professionalism, reliability and the quality of the products enabled Calflex to build business partnerships abroad by acquiring an international clientele. The company responds and fully satisfies the needs of the most demanding clients by innovating and designing new products that have established themselves to the point of becoming real market trends.

CARIMALI

2014 Calflex focuses on a new corporate philosophy, inspired by the feelings of well-being that each of us wants to experience on a daily basis, and on providing complete and functional designer bathrooms.

With the launch of CARIMALI brand, which incorporates modern design and Made in Italy, the company represents the evolution of the bathroom as an intimate environment where inner being and creativity can be expressed with complete and customisable wellness solutions.

Calflex's mission is to improve quality of life and psychophysical well-being through the creation of design products, without sacrificing functionality and ease of use.

The quest for beauty and simplicity come together in a concept of home spa, elevating the bathroom to an intimate place of personal well-being.

Made in Italy

Product **design** is for CARIMALI design water_space an essential aspect. From the Calflex tradition, lines and shapes are strongly characterised by Italian style and taste. A modern and minimalist design that is always contemporary.

The company continues to invest in **R&D** and in innovative solutions for design, structure and technology to be able to provide exclusive and unique products at an international level. The company know-how is guarded by the in-house technical department, beating heart of company creativity.

Each item is conceived, designed and developed at the Calflex headquarter on the shores of **Lake Orta**. All materials and manufacturing processes are checked in-house. All products are **certified 100% Made in Italy**.

Eco-friendly

The company pays the utmost attention to the reduction of environmental impact both in the design phases and throughout the entire production cycle. The Suntech STP 200 photovoltaic system enables Calflex to produce up to 90,000 kW per year of green energy, more than 80% of its total requirements, and a project of an innovative trigeneration plant underlines the company's commitment to this sector.

When designing, the focus is on the circular economy model in which everything is designed to regenerate value, preventing the production of waste.

The aim is to extend the life of products by ensuring maximum durability and repair. Calflex pays special attention to the environment and water saving throughout the entire range and, in particular, for the new MySlim and OttoMillimetrl shower head collections. A technological innovation inside the shower head reduces the flow rate at the inlet of the shower head and distributes the water evenly over the entire surface of the anti-limescale filter, thus ensuring higher performance with lower water consumption.

Assistance

Calflex's commercial and technical staff is at customer's complete disposal and provides assistance at all stages of the purchasing process. Shipments and orders are handled with the utmost care and attention to different needs, for complete and full customer satisfaction.

Continuous after-sales support. The products are designed to allow the replacement of every single component easily and quickly. Given the reliability of the products, the company guarantees its articles for up to 5 years from proven purchase by the end customer, except for parts subject to particular wear and tear.

Quality

The company has always given priority to the care of materials and pays attention to even the smallest detail. To safeguard quality, 95% of the Calflex range is produced in-house, which includes a high performance galvanic plant.

Calflex relies on a production chain composed of highly specialised suppliers at "zero kilometre". The short-range system, typical of Made in Italy, is structured according to a sustainable development model in order to achieve a low environmental impact. This production process also allows the company constant monitoring of processes and quality, and ensures that both traceability and production sustainability are at the forefront of operations.

Thanks to targeted investments in proprietary moulds, the company is able to offer different price solutions with mixer, shower heads and shower accessories in different materials and finishes, without ever sacrificing aesthetics.

The use of chromium-plated steel, an internal galvanic treatment, guarantees further protection and durability of the products and well highlights the company's commitment to investing in new production technologies that are essential to guarantee the high quality standards that only a Made in Italy handcrafted product can claim. Great importance is also placed on the technical quality of the products, which are supplied as much as possible pre-assembled - high technical standards for fast installation and easy replacement of all components.

TECNOLOGIES

ANTI-LIMING

Anti-liming technology featuring flexible, limescale-resistant certified silicone nozzles for easy removal of limescale build-up.

ECO

WATER SAVING

Flow reducer integrated into the shower head structure for optimised water savings, even on shower heads of large dimensions.

EASY INSTALLATION

Pre-assembled products characterized by kits and technical solutions aiming at simplifying their installation.

EASY MAINTENANCE

The inspectionability of the products simplifies cleaning and maintenance operations and any replacement of spare parts that are always available.

HI-TECH CONNECTION

Wellness devices with integrated Bluetooth connection system for control and management via the customer's own Bluetooth devices.

WATER STOP SYSTEM

Water flow safety stop system.

SAFE AND SECURE INSTALLATION

Protective cover for the safe installation of concealed mixers with an indication of the maximum and minimum concealed depth measurements. Moreover, the cover avoids that deposits, impurities or concrete penetrate the concealed part.

OPTIONAL MOUNTING KIT FOR CONCEALED G 1/2" INLETS

The **special protective polystyrene cover** protects the concealed mixer body from contamination, facilitates installation and provides ample room for manoeuvring both during installation and when replacing control components at a later date with no need for carrying out building work.

Insert the concealed assembly with protection, fixing plates and mounted testing knobs into the groove. Use the supplied rear plate and brackets for wall or plasterboard mounting.

Test for correct operation of the concealed assembly by inserting the supplied handle with the lever pointing towards the arrow indicator (CLOSE). Test the subsequent stages of opening, closure and water diversion.

Check the conceal depths as indicated on the protective cover, finish with plaster and coating.

When the coating is complete, remove the fixing plates and the system testing handle, affixing it flush against the protection.

Trim the protection and create the openings to mount the knobs and valves.

Finish off the installation by inserting and fixing the exposed components.

MOUNTING KIT OPTIONAL FOR CONCEALED G 3/4" INLETS

The stainless steel concealed kit allows all CARIMALI high flow rate thermostatic mixers to be installed safely and rapidly in both masonry and plasterboard walls.

1. Level and secure the concealed box.

2. Fit the thermostatic assembly onto the support plate.

3. Insert the concealed group into the mounting box and secure with the screws provided. Connect the water supply and test the system.

4. Remove the protection. Finish with plaster and lay the coating. Lastly, install and secure the aesthetic plate of the thermostatic with all components.

**PROTECTIVE COVER CONCEALED PART
WALL-MOUNTED WASHBASIN MIXER**

The **special protective polystyrene cover** protects the concealed mixer body from contamination, facilitates installation and provides ample room for manoeuvring both during installation and when replacing control components at a later date with no need for carrying out building work.

1.

Insert the concealed group with protection, fixing plates and testing knobs fitted into the groove in the wall. Use the supplied rear plate and brackets for wall or plasterboard mounting.

2.

Check the conceal depths as indicated on the protective cover, finish with plaster and coating. Test for correct operation of the concealed assembly by inserting the supplied handle. Test open/close operation.

3.

When the coating is complete, remove the fixing plates and the system testing handle.

4.

Trim the polystyrene protection and create openings to mount the knobs.

Finish off the installation by inserting and fixing the exposed components.

Scull

Design Daniele Poli

Scull was designed under the principles of lightness and sinuosity, capable of combining nautical design inspirations with the practicality of furniture

Single-hole tall washbasin mixer

Inspectable and serviceable shower head

Concealed shower mixer with integrated duplex

Single-hole bidet mixer

Originality

Scull is sheer architecture, a blend of functionality and form that intentionally breaks with classical rules.

Design

The brand-new design merges with a shrewd study of lines and a wise use of natural materials that bring the standards of well-being to new levels.

Craftsmanship

Scull is synonymous for craftsmanship. The pure pursuit of beauty and durability of materials makes each element a unique piece, designed and crafted to become the protagonist of the scene.

Scull

Organic shapes meet the fluid lines of nautical design to bring life to a product that celebrates the relationship among man, water and well-being. The Scull washbasin draws inspiration from the bow of a 30's sailboat, while the integrated single-lever faucet recalls its helm. Together, the two elements give rise to a unique product design and an entire collection dedicated to the bathroom environment.

A creative gesture can make us travel through time, giving new meanings to the stylistic elements of the past: QTime.

The elementary geometry of the cylinder engraved by a sign of time: the grooves of a Doric column sculpt the material by generating a new classic.

Wall-mounted washbasin spout remote controls with rosaces

Bidet mixer with remote controls

Set shower head OttoMillimetri and arm Spigolo

3-hole tall washbasin mixer

Concealed shower mixer with integrated duplex

Balance

Expertly balanced lines and basic shapes find application in the body and in the spout for a minimalist style.

Design

Contrasting shapes and geometries merge together in a timeless dialogue, for a story that speaks of well-being, balance and peace.

Classic & Contemporary

Soft but rigorous lines at the same time: classicism becomes contemporary.

QTime

With QTime a new small-scale architectural landscape is born: revisited classic lines create an environment where contrasts live in an interplay of material, surfaces and colours.

OCube

Design Architect Marco Fumagalli

A rigorous environment in shape and surface enriched by a detail: OCube.

Minimalist shapes take the lead in a functional microcosm exploration. The product details are transformed into micro-architectures. The controls together build an urban landscape made up of knobs, spouts and diverters which acquire an almost architectural value through the purity of their shapes.

Precious detail

A detail characterizes these pure and regular facades, making OCube unique and immediately recognizable.

Design

Thanks to the finishes, a trick of reflections highlights the clean forms and the study of detail.

Play with contrasts

Game of contrasts, or tone on tone, the choice is free. The study of details and their value can and must make the difference; this is where OCube plays its trump card.

Wall-mounted washbasin mixer remote controls with rosaces

Single-hole bidet mixer

Set shower head OttoMillimetri and arm Extreme

3-hole tall washbasin mixer

Concealed shower mixer with integrated duplex

OCube

Rational architecture with its proportions, rules and alignments leads us on this journey: pure and essential shapes that a detail makes distinctive. A rigorous environment in shapes and surfaces can get precious details that can be touched making OCube series unique and immediately recognisable.

DSide

Design Architect Marco Fumagalli

With a simple gesture the shapes become articulated, taking on a distinctive and recognizable character, so DSide is born.

Geometric shapes, simple and complex at the same time, are at the root of the structure of minerals.

Architecture captures the forms and the rules, design interprets them.

Distinctive character

The finishes emphasise geometric shapes by highlighting volumes and enhancing details, giving them their own distinctive and recognizable character.

Design

What is defined as minimal design does not necessarily consist of elementary forms. The complexity is generated by a simple variation of the basic geometry, which builds relationships between the sides and the angles that define the volume.

Rules and complexity

Geometry takes on a leading value in the form construction, detail becomes rule. DSide turns the balance upside down, recompose it and raise it to a precious and harmonious whole. The finishes put in evidence the geometric shapes by highlighting the volumes and enhancing the details.

Wall-mounted washbasin mixer remote controls with plate

3-hole tall washbasin mixer

3-hole bidet mixer

Ceiling-mounted OttoMillimetri shower head

Concealed shower mixer with integrated duplex

DSide

Light, unexpected geometries, dynamic surfaces, everything contributes to the construction of a unique bathroom environment. DSide leads the game with its shapes and its precious details, communicates with the environment by harmonizing and enriching it.

Still-Oh

Still-Oh is the result of a complex alchemy between forms and functions.

The collection reinterprets a traditional product of the company, the STILO shower head, which with STILL-OH is revisited in a modern key and enriched to become a complete serie with faucets and showers, while maintaining its distinctive touch.

Iconic identities

The sinuous and comfortable lines of the spouts meet the solid volumes of the controls, enriched by a precious and elegant detail, to generate a contemporary and exclusive design.

Alchemy and style

Still-Oh is the perfect alchemy between forms and functions. The collection characterises the bathroom with an original and precious style: unique, elegant and functional elements merge together.

Significant details

A precious detail that gives a simple and clean line a unique personality. Still-Oh was created to decorate a functional bathroom with a strong yet refined character.

Wall-mounted mixer

Single-hole bidet mixer

2-hole tall washbasin mixer

Set shower head Still-Oh and arm Tondo S

Concealed thermostatic bathtub shower mixer

Still-Oh

Still-Oh is the result of a complex synergy between functionality and design.

The carefully studied ergonomics, as well as aesthetics and the brilliance of a detail, are essential ingredients that contribute to the definition of a timeless identity.

Race

Simplicity that becomes refinement,
a sign that becomes precious: Race.

**Sobriety, practicality, functionality but also style, elegance,
class: the weave impressed on the metal sculpts
the identity of a dynamic, contemporary collection
and a style that becomes iconic.**

A unique sign

A distinctive sign to give the
bathroom an even stronger
density, making each project
unique and strongly identifiable.

Navis316

Design, functionality and steel-proof resistance:
Navis316.

**Noble and recyclable, stainless steel
is the main protagonist of the Navis316 collection,
produced with the specific AISI316L alloy.**

Noble material

The Stainless steel AISI316L is synonymous with performance, hygiene, strength and ease of care.

Stainless steel design

The purity of stainless steel enhances design: aesthetics is expressed by subtraction of elements to highlight its functional component and versatility.

Navis316

Essential design and functionality, combined with sustainability and eco-friendliness, are at the centre of the design of Navis316: the simple, clean geometries of the line enhance the natural elegance of steel, creating a collection capable of interpreting trends and exploiting the multiple properties of the stainless steel AISI316L.

IlTondo

Pastel colours, material and form come together, giving birth to IlTondo.

The circle, symbol of harmony, balance and lack of oppositions, recalls the cyclic nature of life.

Wall-mounted washbasin mixer

Single-hole washbasin mixer

Standard version or energy saving system

Embossed texture RAL colours on request

Single-hole tall washbasin mixer

Wall-mounted shower head

Freestanding tub column

Distinctive texture

A new, unique and personal bathroom concept that makes colour and embossed texture its hallmarks.

Lines and proportions

The simplicity of the lines and perfectly balanced proportions of the products meet the vibrant power of pastel shades, generating a new and unmistakable style.

Material and colour

Minimalist shapes in which colours exalt material texture and dialogue with the environment.

IlTondo

Pastel colours, material and form come together giving life to ILTONDO, a new concept of unique and personal bathroom furniture, which makes colour and embossed texture its hallmarks. The simplicity of lines and perfectly balanced proportions meet the vibrant strength of pastel colours, generating an unmistakable new style.

IlQuadro

Perfect proportions, rigorous shapes, refined lines:
IlQuadro, synonymous with equilibrium.

**Minimalist and modern style
resulting from a well-balanced
interplay of geometries.**

A simple gesture

Turning an everyday gesture
into an elegant ritual.

Single-hole
washbasin mixer

Concealed
washbasin mixer

Single-hole

Concealed shower
mixer with
integrated duplex

Set shower
head MySlim
and arm Extreme

IlQuadro

The square shape, with its geometric balance, evokes solidity, stability and protection. While its rounded shape evokes dynamism, serenity and completeness. In IlQuadro collection, two geometries merge into a perfect balance of contrasts to enhance functionality and elegance.

MySpring

Soft lines with a strong, modern feature:
MySpring

Spring, symbol of the harmony of the universe and of life reborn, inspires MySpring collection where the study of form meets the search for comfort.

Perfect combination

The study and enhancement of materials are the starting and finishing point of this collection where volumes become vibrant to show themselves in their integral beauty and lines become sharp and decisive in a combination of dynamism and shapes.

Single-hole tall washbasin mixer

Single-hole washbasin mixer

2-way single-control concealed shower mixer

Set shower head Stick and arm Spigolo

Sliding rail kit Kalamita Black Moon

MySpring

Soft but strong and modern lines. MySpring is the perfect combination of freshness, personality and harmony, designed to blend in and dialogue with every type of bathroom environment.

Colonial

An emotion, which like art, becomes tangible.
Sensations, reflections and lines, this is how Colonial was born.

**Tradition coexists with modernity
without sacrificing its most iconic essence.**

Wall-mounted waterfall Colonial

Vertical concealed shower mixer

Body-jet

Duplex Colonial with brass shower with white resin handle

Set shower head Colonial and arm uncino

Concealed shower mixer with simultaneous openings

Sliding rail kit Colonial with brass shower with white resin handle

Classic contemporary

Furnishing the bathroom with a classic style does not mean looking to the past without modernizing: the Colonial line reinterprets the past with a modern eye, enhancing its most representative elements in a contemporary way.

Colonial

The essential nature of classical shapes blends with the most modern minimalism in a perfect mix that finds its balance in the boundary between contrasts and oppositions.

With the Colonial collection, tradition coexists with modernity without sacrificing its most iconic essence.

Concealed Shower Heads

MYDREAM

MyDream shower head, in the IlQuadro, IlTondo and Colonial collections, is Carimali's product par excellence: an element that embodies its values and represents its way of conceiving the shower space. With MyDream shower heads, the

bathroom becomes a place of pleasure and relaxation, a place where you can nourish your psychophysical well-being and rediscover your intimacy. The range proposes different styles to satisfy every need and complete every type of environment.

FALSE CEILING SHOWER HEAD INSTALLATION KIT

Kit for installation of MySlim and Ottomillimetri shower heads flush with false ceiling

Use of inspectable and serviceable shower heads is recommended

Patented

ART €
KIT00006 65,50

A
Arrange a ceiling connection with G 1/2" M outlet in the proximity of the location of the shower head to be installed and a false ceiling at a distance from the G 1/2" M outlet between 135 mm and 160 mm.

B
Prepare a hole of approximately Ø 150 mm in the false ceiling near the plumbing connection, screw hermetically the threaded fitting using a 24 mm wrench with hemp or similar materials.

C
Apply the provided felt pads and the protective gasket on the top surface of the shower head. Then screw the adjustment kit on the shower head by using a wrench of 24mm and 22mm.

D
Insert the shower head with adjustment kit into the hole near the threaded fitting.

E
Tighten the shower head by hand as shown in the figure.

F
When installation is complete, ensure that the shower head is perfectly stick to the false ceiling.

700 x 500

- Inspectable and serviceable
- 4 replaceable cartridges ¹
- Minimum flow rate standard version 20 l/min
- Pressure limiter at 1 bar ²
- Version with ECO rain jet available ³
- Easy-clean system, anti-liming silicone nozzles

CARIMALI offers a chromotherapy system able to recreate a real beam of light that shrouds the entire body and illuminates the surrounding walls, by giving a sensation of real psychophysical wellness.

The chromotherapy kit is suitable for both false ceilings and plasterboard islands.

The LEDs are equipped with various features:

chromotherapy and white light for illumination (110 lm included) that could be turned on by switch control or remote control. The kit could also be directly connected to any standard light switch or home automation systems.

BENEFITS

1. The LEDs in the kit include a number of features: the same LED provides both a cycle of chromotherapy colours and white light for illumination. This makes it possible to replace the entire bathroom lighting and extend the colour therapy to the whole area.
2. The LEDs' Lumen/Watt ratio (brightness) is among the highest present on the market – for the same power consumption, CARIMALI design shower_space LEDs have a superior brightness.
3. The LED light source is manufactured in South Korea, which guarantees the best technology currently available on the market.
4. LED life of up to 60.000 hours is guaranteed. The optimisation of the heat-loss system avoids any overheat and therefore ensures a highest useful life.
5. The coupling between the primary and secondary LED lens is optimised to favour the maximum lumen output towards the area of use.
6. Waterproof system: perfect waterproof and steam resistance.
7. Kit supplied pre-wired and ready for installation. The connection cables in the kit are supplied with connectors and pre-wiring. To install, simply connect the components according to the instructions provided with no further connections or modifications being required by the installer.

TECHNICAL SPECIFICATIONS

Chrome-plated brass spotlights.
 Spotlight with cable L=30cm and 5-way M8 female connector
 O-ring gaskets on both front and bottom
 4W RGBW light source

Light beam width: 30°
 Edison Opto LED, KATHOD optic
 85-264 V 47 Hz electrical connection
 Recommended 1 LED per square metre

MYDREAM / CONCEALED MULTIFUNCTIONAL SHOWER HEADS IN SERIES

Evocative emotional settings in sequence

The evolution of the bathroom as an intimate place in which to express one's interiority and creativity.

We offer complete and customisable wellness solutions for any environment, whether domestic to transform the bathroom into a refuge of well-being and relaxation, or professional to enrich the proposal of wellness centres and accommodation facilities, offering a complete multi-sensory experience in a perfect combination between of functionality and emotion.

We conceive, design and realise tailor-made projects that respond to any specific need and desire of our customers, designing together the best solution.

MYDREAM / CONCEALED MULTIFUNCTIONAL SHOWER HEAD

Relaxation, magic and amazement all in one solution

With our multifunctional shower heads, the bathroom becomes a place of pleasure and relaxation, a place where you can nourish your psychophysical well-being and rediscover your intimacy.

The collection propose different styles to satisfy every need and complete all types of environment.

Among its functions, it is possible to select the water effect between rain, single waterfall, double waterfall, mist, tropical waterfall and Kneipp for a feeling of complete relaxation.

Equipped with LED spotlights for chromotherapy, you can choose the colour gradation of the spotlight or let yourself be enveloped by the coloured path for a true immersion in physical and mental well-being.

A rainbow of exciting colours and water in its various forms combine their benefits to create a pleasant multi-sensory experience.

Colours, water and lights can be selected manually during the shower, or set for an automatic cycle.

Several showerheads in series (single- and/ or multi-jet) controlled by a start button or with touch control and electronic faucet.

Sensorial showers are an indispensable addition to the wellness area and home spa today. Wellness pathways create magical settings by combining light effects, water effects and fragrances. The most sophisticated technologies converge in the shower paths for a unique and unforgettable wellness experience. Depending on the level of interaction accorded to the user, there are two levels of design of the wellness path.

Level 1: Wellness path that consists of starting the path through an on/off push-button panel and the use of an electronic control unit that automatizes the activation in sequence of the different water jets with preset temperature, duration, chromotherapy and aromatherapy.

Level 2: Wellness path using a touch control with an electronic faucet, offering maximum interaction to the user who can independently manage water jets, temperature, duration, up to the setting of chromotherapy and aromatherapy.

Audio system

Body, mind and soul cuddled and surrounded by water and gentle musical notes thanks to music playback via Bluetooth with two high-performance stereo speakers of 2 watts each.

Aromatherapy

To fully experience the pleasure of being enveloped by the scents diffused by the aromatised water that evoke memories and awaken the senses, giving a sensation of total relaxation.

Body-jet

Body-jets (available in square, round and colonial versions), small shower jets to be installed on the front or side walls of the shower enclosure, are able to massage the body gently with lateral jets of water and provide a unique sensation of well-being.

Details

**MOUNTING KIT
FOR CONCEALED PART SHOWER MIXER
INLETS G 1/2"**

The **special protective polystyrene cover** protects the concealed mixer body from contamination, facilitates installation and provides ample room for manoeuvring both during installation and when replacing control components at a later date with no need for carrying out building work.

Insert the concealed assembly with protection, fixing plates and mounted testing knobs into the groove. Use the supplied rear plate and brackets for wall or plasterboard mounting.

Test for correct operation of the concealed assembly by inserting the supplied handle with the lever pointing towards the arrow indicator (CLOSE). Test the subsequent stages of opening, closure and water diversion.

Check the conceal depths as indicated on the protective cover, finish with plaster and coating.

When the coating is complete, remove the fixing plates and the system testing handle, affixing it flush against the protection.

Trim the protection and create the openings to mount the knobs and valves.

Finish off the installation by inserting and fixing the exposed components.

**OPTIONAL MOUNTING KIT
FOR CONCEALED PART SHOWER MIXER
INLETS G 3/4"**

The stainless steel concealed kit allows all CARIMALI high flow rate thermostatic mixers to be installed safely and rapidly in both masonry and plasterboard walls.

1.
Level and secure the concealed box.

2.
Fit the thermostatic assembly onto the support plate.

3.
Insert the concealed group into the mounting box and secure with the screws provided. Connect the water supply and test the system.

4.
Remove the protection. Finish with plaster and lay the coating. Lastly, install and secure the aesthetic plate of the thermostatic with all components.

**PROTECTIVE COVER CONCEALED PART
WALL-MOUNTED WASHBASIN MIXER**

The **special protective polystyrene cover** protects the concealed mixer body from contamination, facilitates installation and provides ample room for manoeuvring both during installation and when replacing control components at a later date with no need for carrying out building work.

EASY-GRIP KIT

All mixers in the IlTondo range are equipped with an "easy-grip kit" which allows a pin to be added to the smooth handle in a few simple steps, thus making it easier to grip.

1.
Insert the concealed group with protection, fixing plates and testing knobs fitted into the groove in the wall.
Use the supplied rear plate and brackets for wall or plasterboard mounting.

2.
Check the conceal depths as indicated on the protective cover, finish with plaster and coating.
Test for correct operation of the concealed assembly by inserting the supplied handle.
Test open/close operation.

3.
When the coating is complete, remove the fixing plates and the system testing handle.

4.
Trim the polystyrene protection and create openings to mount the knobs.
Finish off the installation by inserting and fixing the exposed components.

1 - GRAIN M5x20
2 - PIN

Remove the plug from the handle

Unscrew the grain inside the handle

Screw in grain M5x20

Screw in the pin

MIXERS**ENERGY SAVING SYSTEM AND WATER SAVING**

The **programme dedicated to energy and water saving** brings together a series of technologies conceived, designed and realised in-house that allow to generate an effective reduction in consumption with a positive economic and environmental impact.

It is possible to have the products in the standard version or with Energy Saving System cartridge.

HOW IT WORKS

The **Energy Saving cartridge** limits the accidental opening of hot water when the lever is in parallel position to the mixer spout.

Unlike classic mixers, in order to request hot water and activate the boiler, it needs a voluntary leftward movement of the lever.

This specific cartridge, when the lever is in a aligned position with the faucet mouth, allows opening in cold water only. In this way, the cartridge limits the unintentional opening of the hot water and the consequent switching on of the boiler, thus saving energy.

ECO
WATER
SAVING

**ENERGY
SAVING
SYSTEM**

**TECHNICAL FEATURES**

Cartridge ø25 mm with high o-ring (immersed version)

25° lever opening angle

100° rotation of the lever during mixing

WATER SAVING

The mixers are equipped with a water-saving aerator which limits the flow rate to 6 litres per minute.

AUTOMATIC DIVERTER WITH STOP

Automatic diverter with stop

Automatic diverter with stop

1. In the home position (with the diverter pulled), water is diverted to outlet 1 (main utility).

2. By pressing the diverter, water is diverted to the shower (2). The button returns to the home position, shutting off the water.

In the event that the button always returns to its initial position, preventing diversion to the hand shower (an issue due to system pressures of less than one bar), the manual stop system allows manual intervention. Simply press and turn the button clockwise until it locks. In this case, water will always flow out of the hand shower. To return to the home position, turn the diverter clockwise until it is released.

The thermostatic mixer can be configured by combining the thermostat alone with up to 3 diverters with 2 or 3 outlets, thus connecting up to a maximum of 9 outlets. The individual controls allow maximum freedom of expression by providing various combination possibilities and complete freedom of positioning (vertical, horizontal, in proximity of the various utilities, etc.)

Example of 2-WAY THERMOSTATIC configuration

- W21800 = concealed part thermostatic only
- + W21801 = concealed part diverter with stop 2 outlets

Example of 3-WAY THERMOSTATIC configuration

- W21800 = concealed part thermostatic only
- + W21802 = concealed part diverter with stop 3 outlets

Example of 4-WAY THERMOSTATIC configuration

- W21800 = concealed part thermostatic only
- + W21801 = concealed part diverter with stop 2 outlets
- + W21801 = concealed part diverter with stop 2 outlets

Example of 5-WAY THERMOSTATIC configuration

- W21800 = concealed part thermostatic only
- + W21801 = concealed part diverter with stop 2 outlets
- + W21802 = concealed part diverter with stop 3 outlets

Example of 6-WAY THERMOSTATIC configuration

- W21800 = concealed part thermostatic only
- + W21802 = concealed part diverter with stop 3 outlets
- + W21802 = concealed part diverter with stop 3 outlets

Example of 6-WAY THERMOSTATIC configuration

- W21800 = concealed part thermostatic only
- + W21801 = concealed part diverter with stop 2 outlets
- + W21801 = concealed part diverter with stop 2 outlets
- + W21801 = concealed part diverter with stop 2 outlets

Example of 7-WAY THERMOSTATIC configuration

- W21800 = concealed part thermostatic only
- + W21801 = concealed part diverter with stop 2 outlets
- + W21801 = concealed part diverter with stop 2 outlets
- + W21802 = concealed part diverter with stop 3 outlets

Example of 9-WAY THERMOSTATIC configuration

- W21800 = concealed part thermostatic only
- + W21802 = concealed part diverter with stop 3 outlets
- + W21802 = concealed part diverter with stop 3 outlets
- + W21802 = concealed part diverter with stop 3 outlets

CONFIGURE YOUR THERMOSTATIC MIXER

* NOTE. Match the concealed parts in the examples with outer parts of IlTondo, IlQuadro, Colonial, Race, Navis316 collections.

**PUSH-LEVER SHOWERS:
SAFETY SYSTEM**

TIMED PUSH-LEVER SHOWER SET

Complete safety: water flow is regulated by a timed tap (20" closure).

PUSH-LEVER SHOWER SET WITH SAFETY STOP SYSTEM

Complete safety: the tap control lever must be returned to its closed position to put the push-lever shower back in the holder.

PUSH-LEVER WITH SAFETY VALVE

Complete safety: by placing the push-lever shower in the holder, the flow of water is shut off because of the safety valve integrated in the mixer.
NOTE: The water flow should always be shut off with the opening and closing handle.

**FROM THERMOSTATIC TO MECHANICAL
AND VICE VERSA**

CARIMALI external mixers are the **ONLY** ones that can be converted from thermostatic to mechanical (and vice versa) by simply changing the cartridge.

**EASY and QUICK
procedure of a few
simple steps**

Thanks to simple kits complete with everything you need:

- Cartridge**
- New handle**
- Adapter**
- Installation tools**

1. Unscrew the grains on the temperature control handle

2. Remove existing cartridge and temperature control handle

3. Insert the adapter

4. Insert the new cartridge

5. Insert the new handle

**CARTRIDGE REPLACEMENT
CONCEALED SHOWER HEAD MYDREAM**

The shower head is designed for optimum durability. The rain jet operating system consists of individual cartridges for optimum, uniform water distribution and easy replacement.

ART	ITEM DESCRIPTION	€
KIT00128	MyDream ECO cartridge replacement kit	62,00
KIT00028	MyDream Standard cartridge replacement kit	72,50

NOTE! Check the number of cartridges according to the model and purchase the required number of kits to replace all cartridges.

**MYDREAM
ECO CARTRIDGE**

New ECO cartridge for MyDream shower heads
Maximum performance, minimum consumption.

MODEL	Minimum flow rate	No. of nozzles	Specifications
standard cartridge 	5 l/min	121 open nozzles	<ul style="list-style-type: none"> • Full, consistent jet • To be paired with a suitable thermo-technical system
ecocartridge 	3 l/min	81 open nozzles	<ul style="list-style-type: none"> • Intense, high-performance jet • Reduced water consumption • Ideal for domestic use, renovations and hotel systems • Reduced flow rate for easy discharge

HOW TO ORDER

The ECO version of the MyDream shower heads in the catalogue can be purchased at the same price by simply adding ECO to the article code.

It is possible to switch from the standard version to the ECO version by purchasing the KIT00128 to replace the standard cartridges on a purchased shower head.

NOTE! Check the number of cartridges according to the model and purchase the required number of kits to replace all cartridges.

MYDREAM SAFETY KIT

For installations in spas, wellness centres or private homes equipped with a pump and pressure boosting system, purchase of KIT00029 is recommended. This guarantees a tight cartridge seal even in the event of pressures of 4 bar.

ART	ITEM DESCRIPTION	€
KIT00029*	MyDream safety kit	31,50

1 Check the number of cartridges according to the model and purchase the required number of kits to fit all cartridges.

MYDREAM PRESSURE RELIEF VALVE

In the event of pressure increase due to:
 - clogged nozzles
 - high line pressure
 - water hammer

The pressure limiter reduces the pressure to 1 bar by reducing the transit of water inside the shower head. This reduces the risk of deformation or damage to the article.

The company, which has always focused on improving its products, has included this valve as standard on all MyDream shower heads since November 2019.

For shower heads purchased prior to November 2019, it is advisable to purchase a pressure relief valve art. KIT00031/SC

ART	DESCRIPTION	€
KIT00031/SC*	Pressure relief valve	40,00

***KIT00031/SC :**
 For shower heads with more than 4 cartridges, purchase 2 kits

FALSE CEILING SHOWER HEAD INSTALLATION KIT

Kit for installation of MySlim and Ottomillimetri shower heads flush with false ceiling

Use of inspectable and serviceable shower heads is recommended

Patented

ART	€
KIT00006	65,50

A
 Arrange a ceiling connection with G 1/2" M outlet in the proximity of the location of the shower head to be installed and a false ceiling at a distance from the G 1/2" M outlet between 135 mm and 160 mm.

B
 Prepare a hole of approximately Ø 150 mm in the false ceiling near the plumbing connection, screw hermetically the threaded fitting using a 24 mm wrench with hemp or similar materials.

C
 Apply the provided felt pads and the protective gasket on the top surface of the shower head. Then screw the adjustment kit on the shower head by using a wrench of 24mm and 22mm.

D
 Insert the shower head with adjustment kit into the hole near the threaded fitting.

E
 Tighten the shower head by hand as shown in the figure.

F
 When installation is complete, ensure that the shower head is perfectly stick to the false ceiling.

MAINTENANCE OF MYSLIM AND OTTOMILLIMETRI SHOWER HEADS

The technology integrated into the shower head makes it possible to replace the nozzles and clean the inside of the filter in a few simple steps.

HOLDER FOR MINIMAL SHOWER ARM

Holder for Ø 20 1/2" mm minimal shower arm to be paired with large shower heads.

Carimali's minimal shower arm holder ensures stability and anchoring of the shower arm paired with large shower heads

D500 D400 500x350 400x400 400x300

EASY MAINTENANCE

1. Unscrew the grains

2. Open the ultra-thin shower head

3. Replace the anti-liming nozzle

4. Clean the filter

BENEFITS

Inspectable and serviceable

Polished edge

Anti-liming nozzles

BENEFITS

Fixing screws directly to the wall for maximum anchoring. HIDDEN

Minimal design shower

Large shower heads:

D500 D400 500x350 400x400 400x300

1. Easy installation

2. Option of pairing a large shower head with a minimalist style shower arm with maximum safety

3. Maximum anchoring even on plasterboard walls

**WATERFALL OH!
ADJUSTABLE JET**

Jet adaptable
to operating pressure

The shape of the jet can be varied by turning the 3 screws at the rear of the waterfall using a 2 mm Allen key:

- clockwise = thin blade/wide jet;
- counter-clockwise = thick blade/narrow jet

INSPECTABLE CARTRIDGE

All Carimali items are designed to be durable and maintain optimum performance and the same quality standards as an item that has just been purchased.

The option of easily inspecting a cartridge and removing impurities and liming means that the high level of performance of the product can be maintained at all times or any worn and compromised components can be replaced over time.

INSTALLATION WITH NO CONCEALMENT

Procure a G 1/2" fitting for the installation of the waterfall.

Finish with plaster and lay the coating.

NOTE:
minimum permissible depth between thread base and finished coating 30 mm.

NOTE:
maximum permissible depth between G1/2" fitting and finished coating 20 mm.

SCENTED WATER SYSTEM

The use of fragrances stimulates olfactory memory, which cannot be controlled voluntarily. Smells and perfumes remain imprinted in the human brain for a very long time.

Unlike the other senses, olfactory stimulation is the only one to travel directly into the cerebral cortex, which is responsible for emotion, memory, perception and all related cognitive functions.

For this reason, the choice of an aromatherapy and essence system is very important. Carimali's new system maximises the overall sensory experience.

OPERATION

1. Choose which jet to connect the scented water system to
2. Once the peristaltic metering pump is connected to the jet, the flow rate of an essence may be adjusted for an immersive, ly personalised experience.
3. START-UP: To operate the scented water system, open the jet with the mixer and begin dispensing the essence by pressing the button on the Carimali switch control (article 0P001-CR page 386). Activation of a scented system independently of jet flow allows the freedom to choose whether and when to use the system without being forced to do so.
4. Once activated, the operating cycle includes: few seconds dispensing few seconds pause for a certain time.
5. SWITCH-OFF: To stop dispensing press the button on the Carimali switch control once more (article 0P001-CR page 386).

INSTALLATION TIPS

**STRENGTHS
NEW MYDREAM**

- Minimalist design
- Chrome-plated stainless steel with galvanic treatment
- Ease of installation
- Inspectable and serviceable
- ECO version available: maximum performance, minimum consumption
- Possibility of purchasing the standard model and subsequently add more functions (subject to preparation of electrical and hydraulic connections)
- The cartridges, regardless of the function of the jet (blade or tropical), are interchangeable; in this way it is also possible to change the jet type at a later time.

**AUDIO
SYSTEM**

- A ON/OFF SWITCH (optional)
- B AUDIO SPEAKER
- C SWITCH CONTROL
- D SHOWER HEAD
- E CONTROL UNIT

RAIN
An intense, full jet reproduces the feeling of a relaxing rain shower on your skin.

ATOMIZERS
A refreshing mist that envelops the body in a soft, misty embrace.

DOUBLE BLADE-JET WATERFALL
A double massaging waterfall to relax muscular tension and give a sense of well-being.

SINGLE BLADE-JET WATERFALL
The power of a vigorous jet that regenerates the soul like a natural waterfall.

DOUBLE TROPICAL WATERFALL
A double waterfall to create the effect of a tropical rain shower that, as it falls, relieves and reduces stress.

SINGLE TROPICAL WATERFALL
A continuous, enveloping and relaxing jet that massages and recharges the body with positive energy.

CHROMOTHERAPY
The gentle light of chromotherapy envelops the entire body and the surrounding walls.

CONCEALED

The audio device consists of 2 high-performance stereo speakers that are easy to install. The speakers are sized to fit a concealed 503E power & switching box for 3 standard modules.

By preparing the electrical connection in the power & switching box and a Ø25 mm duct connecting the control unit and the two audio speakers, a music system can be installed not only in the bathroom but also in other areas in the house.

OPERATION

Connect to the CARIMALI design shower_space audio system by selecting "CARIMALI" in the Bluetooth menu of your device (smartphone or tablet). The product is compatible with Bluetooth® 3.0, 2.1+EDR, 1.2 and 1.1 versions and uses Secure Simple Pairing (SSP) technology which, in addition to improving the synchronisation experience, increases connection security. No PIN code is required to connect to the device. The device has been designed to achieve full compatibility with most devices. Auto-off after 1 minute from loss of connection or after 4 hours from power on..

HIGH WALL OUTLET COLUMN SPECIAL RENOVATION

REPLACEMENT AND BENEFITS

CARIMALI high wall outlet columns allow the customer to replace their single-function shower head with DESIGN COLUMNS that have a dual function – a relaxing rain shower and a utility shower, with no damage to the coating.

1. Removal
2. Fixing the rail
3. Opening rain jet
4. Opening directional jet

TECHNICAL DETAILS

CARIMALI high wall outlet columns are adjustable in height: Extensions (10 cm each) allow the height of the upper shower arm of the column to be adjusted to suit the position of the existing water fitting at 1.90 m, 2.00 m or 2.10 m.

HIGH WALL OUTLET COLUMN

High wall outlet columns are also available with different center distances: depending on the position of the existing water fitting and the installed mixer, the column with the most suitable center distance may be selected.

- A → 800 mm.
- B → 700 mm.
- C → 600 mm.

FEATURES MYDREAM SHOWER HEADS

Rain
An intense, full jet mimics the feeling of a relaxing rain shower on your skin.

Centre rain + perimeter rain
An intense, full jet mimics the feeling of a relaxing rain shower on your skin.

Single waterfall
The power of a vigorous jet that regenerates the soul like a true, natural waterfall.

Perimeter rain
A comfortable rain jet that centres on the body leaving the face free and in direct contact with the steam inside the shower.

Centre rain
A centre rain jet to enjoy a concentrated, regenerative effect.

Double waterfall
A double massaging waterfall relieves muscle tension and provides a sense of well-being.

Single waterfall
The power of a vigorous jet that regenerates the soul like a true, natural waterfall.

Double tropical waterfall
A double waterfall to create the effect of a tropical rain shower that, as it falls, relieves and reduces stress.

Single tropical waterfall
A continuous, enveloping and relaxing jet that massages and recharges the body with positive energy.

Atomizers
A refreshing mist envelops the body in a soft, mist-like embrace.

Chromotherapy
The diffuse chromotherapy light envelops the entire body and the surrounding walls.

BENEFITS MYDREAM

- Chrome-plated stainless steel with electroplating treatment
- Ease of installation
- Inspectability and serviceability (See details page 540)
- ECO version available: maximum performance, minimum consumption (See details page 541)
- Adjustable and inspectable waterfall jet (See details page 546 for MyDream and page 548 for New MyDream)
- Hidden fixing screws
- Option of purchasing the standard model and adding more functions at a later date (after setting up the electrical and plumbing connections)

an intense, full jet mimics the sensation of a relaxing rain shower on the skin.

Soft jet *
an aerated jet that envelops the body in a soft, relaxing massage.

Single waterfall *
The power of a vigorous jet that regenerates the soul like a true, natural waterfall.

Chromotherapy *
The diffuse chromotherapy light envelops the entire body and the surrounding walls.

BENEFITS WALL- AND CEILING-MOUNTED SHOWER HEADS

- Wide range of solutions for design, functionality and installation options
- Chrome-plated stainless steel with electroplating treatment for all inspectable and serviceable versions
- Option of different finishings for all inspectable and serviceable versions
- Easy-clean anti-liming silicone nozzles for easy maintenance

* Functions available only for "Yes" model, see page 351

Waterfall jet projection test at 3 bar
(standard mains water system pressure).

Waterfall jet projection test at 3 bar
(standard mains water system pressure).

Recommended installation locations.

H (cm)	150	160	170	180	190	200	210
A (cm)	190	200	210	220	230	240	250
B	Position at shoulder height						
C	Position at lumbar zone height						
D	Position at thigh height						

The spray angle at 3 bar is 70°.

(B)	10 cm	15 cm	20 cm	25 cm	30 cm	35 cm	40 cm	45 cm	50 cm	55 cm	60 cm	70 cm	75 cm	80 cm	85 cm	90 cm	95 cm	100 cm	110 cm	120 cm	130 cm	140 cm	150 cm

Whirlpool jet performance.

Example

A) Theoretical coverage of spray jet.

B) Distance of person from spray nozzle.

It is advisable to install at least 2 atomizers at the suggested distances to obtain a jet in the back area and a jet in the leg area.

The theoretical coverage of the spray at 35 cm from the spray nozzle at 3 bar is 49 cm (see table above).

PVD - BENEFITS

Physical Vapour Deposition, often abbreviated to PVD, is a method for coating all types of materials with very strong adhesion properties and thin film layering. The PVD treatment, which is also used in the aerospace and biomedical industries, is non-toxic, biocompatible and provides a wide range of colour variations.

The table on the inside of the cover gives an indication of the different price increases for each treatment, depending on article category.

Carimali treatments are divided into 3 macro-categories (MODERN-CLASSIC-PVD). Once the macro-category of the finishing is identified, check the reference category on the article page and apply the corresponding mark-up shown in the table to the list price.

EXAMPLE

IlTondo - Concealed integrated duplex shower mixer 2-way MATT BLACK

- ART. 21828EST/A-CR outer part 2-way € 309,00
- ART. 21838EST/A-CR outer part 3-way € 309,00

USEFUL INFORMATION

- In the case of articles presented in the catalogue as an exposed part + a concealed part, the surcharge is to be applied only to the price of the exposed part.
- In order to allow the various treatments to be carried out, articles must be made of metal (no ABS) and inspectable and serviceable (especially for shower heads and showers).
- The shower heads of the EL'IT, WILL, MySlim, OttoMillimetri and Minimal lines are not treated on the upper part of the cover as it is not visible once the item is installed. It is, however, possible to carry out a treatment on the upper part by requesting a dedicated quote.
- The feasibility of treatments on articles is only confirmed for complete environments.
 Example:
 SHOWER HEAD + SHOWER ARM + DUPLEX + MIXERS
 or
 COLUMN WITH MIXER + SHOWER HEAD + SHOWER etc.
- Feasibility of treatments on individual articles (e.g. only SHOWER HEAD) must be explicitly authorised by Calflex.

DELIVERY TIMES

- MODERN - 3 WEEKS*
- CLASSIC - 3 WEEKS*
- PVD - 4 WEEKS*

*Delivery times are estimated and not binding. Too many requests and/or defects in processing or other unforeseeable events may lead to delays in delivery times.

ORDERS

By placing an order the Customer accepts in full our sale conditions as listed here.
Orders are valid only if they are duly confirmed by Calflex srl.

PRICING

The PRICES in this PRICE list do not include VAT.
The seller reserves the right to update prices, **general conditions of sale and the products themselves (by making changes to articles and/or finishings or even eliminating the model itself from this price list) at any time and at its sole discretion without any obligation to give prior notice.**

TERMS OF DELIVERY

The terms of delivery indicated by us are always approximate and never binding **for the seller.**
They shall not entitle the customer to cancel the order or **suspend/delay payments**, and the **seller** shall not be liable in any way for any direct or indirect damage that may arise from the delayed or non-delivery of all or part of the order. The purchaser shall be obliged to take delivery of the products even in the case of partial deliveries or if delivered before or after the agreed date.
Under no circumstances may the purchaser claim compensation or indemnity of any kind. This includes major delays caused by natural disasters, riots, strikes, fires or other unforeseeable events.

SHIPMENT

Shipping shall be carried out in the manner deemed most appropriate by the seller. Upon delivery, the customer shall be obliged to check the ordered material and make a claim directly to the carrier in the event of tampering with, or damage to, the packaging.

PAYMENTS

Payments shall be made punctually directly to the seller's domicile. After the agreed deadlines, interest on arrears shall be charged.
It should be noted that late payment entitles the seller to suspend, without prior notice, any ongoing supply. Items shall remain the property of the seller until the PRICE has been paid in full.

RETURNS

Goods are always returned ex works and accompanied by our return authorisation number.
The same, even if provided free at destination or in any other special condition, shall travel at the risk and peril of the client, who shall also be responsible for the costs of claims or actions of any kind against the carrier.

IMAGES

All images and illustrations in the PRICE lists, catalogues and brochures are illustrative, do not constitute an obligation of faithful rendering, and are subject to change.
The company reserves the right to make technical and cosmetic changes or modify or delete individual items or complete series without prior notice.

JURISDICTION

In case of disputes Verbania court (Italy) is the only competent court to settle any controversies.

CLAIMS

Any complaints shall be **communicated** in writing within 8 days of receipt of the goods and be accompanied by a **detailed description of the defect and accompanied by videos/photos, warranty and receipt/invoice.**
Please note that our liability shall be limited to the mere replacement of defective components and items found to be defective.
Any and all liability for damage caused to persons or property as a result of the defective items referred to above shall therefore be excluded. Upon replacement, the company shall be entitled to return the defective products, which become its property.
The customer may request the article to be treated as follows:
1- **REPLACEMENT**, following receipt and verification of the defective article by the seller
2- **ADVANCE REPLACEMENT with the immediate sending of the article in replacement** and subsequent verification of the defective article by the seller. In this case, defective products shall be returned strictly within 30 days from the date of the transport document of the material received in advance, otherwise the supplied material shall be invoiced without prior notice.
Material returned from early replacement shall be verified by our technical department.
In the event of damage, defects not covered by the warranty, unsuitable packaging, wear and tear, neglect, lack of maintenance, etc., the material already supplied as a replacement shall be invoiced.

GENERAL CONDITIONS

By issuing the order, the customer unconditionally accepts the above clauses.
Statements, promises and guarantees made by employees, agents and collaborators that differ from the conditions agreed upon or included in our PRICE lists shall only become binding and enforceable after they have been confirmed in writing by the company management.
The customer is responsible for all identification data provided to the seller such as company name - registered office - tax code - VAT number and all others specifically required by current legislation.
Customer data, according to Law 675 / 95, shall be kept and processed for the fulfilment of legal obligations. Any other use must be explicitly accepted by the customer.

To prevent dirt or debris from entering the product and causing operational issues, always purge the system before connecting supply pipes.
It is also advisable to install an appropriate filter at the inlet to the system.
To prevent liming from clogging the diffuser, we recommend regularly rubbing the silicone nozzles to free them from liming and to keep the diffuser clean, and regularly cleaning the aerator filter to remove liming.

CLEANING

To clean metal parts: use a damp cloth with neutral soap, rinse and dry to avoid liming residue. Important: only neutral, soap-based detergents should be used. Do not use abrasive cleaners or disinfectants or those containing alcohol, hydrochloric or phosphoric acid, bleach, chlorine or any other substance.

WARRANTY

Dear Customer, thank you for choosing a CALFLEX S.r.l. product.
The article you have purchased has been manufactured and tested in our production unit located in Z.I. 5/bis, 28891 Nonio (VB), Italy, in compliance with the quality standards laid down in regulations: UNI EN ISO 9001-2015

The warranty period against manufacturing defects for CALFLEX products range is 5 years (unless otherwise stated in writing). The warranty for products with a finish different than chrome is 2 years. Parts subject to wear and tear (mixing cartridge, headworks, non-return valve etc.), after evaluation by Calflex S.r.l., are guaranteed for a period of 2 years from the date of purchase.

The guarantee does not cover damage caused by: improper installation and/or use, incorrect system design, normal wear and tear, damage caused by limescale or impurities, use of cleaning and maintenance products other than those specifically indicated in these instructions.

Furthermore, Calflex S.r.l. shall not be liable for labour costs and/or damages, even those accidental or consequential, occurring during installation, repair or replacement of the product.
Please note that the warranty on the surface of our products is not valid if the material has undergone any treatment other than that suggested by us.
Warranty claims can only be made by presenting a dated document proving the purchase of the product. The warranty only relates to manufacturing defects and only entitles the claimant to the repair or free delivery of the part acknowledged to be defective.

Calflex S.r.l. reserves the right to inspect the disputed part to assess warranty applicability.
The warranty begins on the date of purchase of the product, proven by verifiable documentation (invoice, receipt) and is not renewable.
For further information contact Calflex s.r.l. on +39 0323 889328 or the dealer in your area.
